Full Stack Developer in training with experience in Angular, Node.js, Stripe, and MySQL. I led the development of Velonia, an inventory management and e-commerce platform with payment integration and modular architecture. Passionate about scalable solutions and best practices.

Last semester completed: 8th of Computer Systems Engineering.

DEVELOPMENT EXPERIENCE

Velonia - E-commerce Platform

Angular, Node.js (Express), MySQL, Stripe

- Led the development of the project, coordinating full stack design and implementation of the platform.
- Developed key features: inventory management, online sales, and user authentication.
- Implemented secure payments using Stripe and user authentication.
- Designed and connected the MySQL database in a XAMPP environment.
- Built a scalable and responsive frontend using Angular.

EDUCATION

Instituto Tecnológico Superior de Huauchinango

Bachelor's in Computer Systems Engineering
